

William Anthony

New works

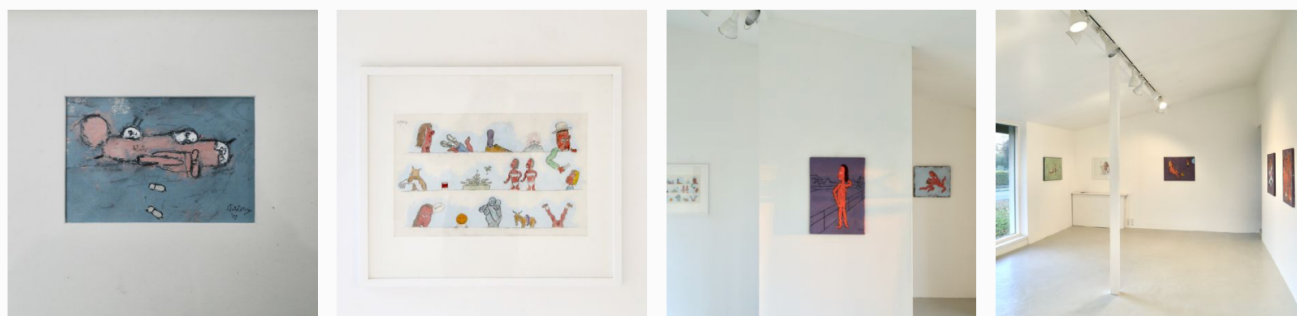

Stalke Galleri, Kirke Sonnerup

October-November 2018

William Anthony presented new works in this exhibition at Stalke Galleri. Over the past two decades, Stalke Galleri has held a number of major exhibitions featuring William Anthony, and the collaboration has been a recurring part of the gallery's exhibition history.

These exhibitions have contributed to situating Anthony's work within a Danish context and have reflected an ongoing dialogue between the artist's practice and the gallery's exhibition framework. The collaboration has also extended beyond the exhibition space through the Stalke Out Of Space project, where the relationship between artist, format, and publication has played a central role.

As part of this collaboration, more than 40 publications have been produced through Artstamp.dk. These editions have accompanied the exhibition activity and form a parallel body of work, constituting a distinct archive within the broader Stalke Out Of Space project.
